

## Company Announcements

July 15<sup>th</sup> 2021

FieldX Android client v2.7.4 is released with more features and stability.

Release Notes:

- Hide Notifications from status bar (set notifications to hide from Web Panel)
- Added manual refresh button in Android client (for the impatient ones)
- View data usage by FieldX in Web Panel
- Added a FieldX specific User-Agent, this helps in configuring Servers to block unwanted or unusual HTTP requests
- Set VPN configuration from FieldX. This helps in sending VPN configuration to your VPN app through FieldX and auto-configure the devices with VPN
- Minor fixes and enhancements on client and server side

### Company Statement on Recent News

We recently came to know about exposé about an encrypted App. We would like to inform that it was mere coincidence that FieldX was used alongside other MDM providers. The agency who procured FieldX licenses, remains as just another paying customers. We are in NO way related to the company or any individual. As a young startup, we have done our best in creating the software and we are constantly focused to provide best features in FieldX. Feel free to write us for any further queries at [info@fieldx.io](mailto:info@fieldx.io)

June 1<sup>st</sup> 2021
